

Sampling Bags

STERILE

With the integrity of test results being directly related to the quality of a sample taken, **TWIRL'EM**® sterile sampling bags provide a safe, protected, contamination-free environment, allowing for accurate test results to be achieved time after time. With sample inserted, once closed, the integrated wire / flat wire closure provides a leakproof seal able to contain either liquid and /or solid materials. Used throughout a wide variety of applications including Clinical, Industrial, Food, Environmental, Pharmaceutical and much more. **TWIRL'EM**® sterile sampling bags are the convenient and cost effective method of choice for quality control sampling programs.

Transportation Bags

STERILE

With document pouch - Bio Hazard Identification

These individually sterile **TWIRL'EM**® sampling bags have the additional feature of an integrated document pouch for paper work insertion. Focused on the Clinical and Hospital marketplace, these bags are printed with the International Bio Hazard symbol which makes them ideal for consolidating patient sample(s) along with the corresponding paperwork.
