

CLIKLOK™ FAMILY OF MICROCENTRIFUGE TUBES

All Simport Microcentrifuge tubes offer a CLIKLOK™ seal especially designed to reduce popping where freezing, boiling, storing or shipping is required. This superior quality CLIKLOK™ system works in two stages:

1. If only spinning is to be done, a slight push of the cap over the tube is required.
2. For a complete seal, press further on snap cap until a CLICK is heard.

MICROCENTRIFUGE TUBES

Made of polypropylene

These 0.6 and 1.5 ml graduated rugged tubes are made of laboratory grade polypropylene suitable to withstand the stress of high speed centrifugation up to 20,000g. The one-piece construction incorporates a snug fitting and reliable attached cap even with prolonged boiling. For maximum sample recovery, the tube interior is highly polished. The bottom is reinforced for added protection against leakage. Maximum clarity for visual sample inspection. A frosted writing surface on closure and side of tube allows for easy and convenient sample identification. Highly polished interior ensures low liquid retention. Autoclavable. Available in four colors.

Packaged in tamperproof resealable safety-lock bags of 500 tubes.

2 ml MICROCENTRIFUGE TUBE

Made of polypropylene

These 2 ml microcentrifuge tubes offer a special locking clasp to produce a more secure closure. This will help to prevent tubes from opening during centrifugation, boiling, storing, freezing and shipping. They are graduated at 0.5, 1.0 and 1.5 ml. Pierceable lid. Etched surface on side of tube for sample identification. Autoclavable. Packaged in tamperproof resealable safety-lock bags of 500 tubes.
