

# T320 AMPLITUBE™ PCR REACTION STRIPS

Made of polypropylene

**Simport** Reaction Strips include 8 or 12 integral 0.2 ml tubes with ultrathin sidewalls and bottoms for more uniform and efficient temperature transfer, therefore reducing PCR reaction time in most 96-well "V" bottomed thermal cyclers such as MJ Research, Perkin Elmer, Hybaid and others.

They are more easily handled than single tubes. They will precisely fit standard well spacing and can also be used with 8- and 12-channel hand-held pipettors. All strips are molded of polypropylene under the most stringent conditions.

Choice of colorless and in four different colors. Autoclavable.

Packed in tamperproof resealable bags.

**Non-attached cap strips are available in a dome or flat top design** and ensure a perfect closure during the whole thermal cycle. Cap strips are not included and have to be ordered separately (see T321 Series).

All PCR® products on this page are certified.  
*RNase-free, DNase-free and DNA-free.*

- 1 Domed and flat caps also provide a snap shut positive seal
- 2 Pierceable flat cap
- 3 Can be cut and used as individual tubes
- 4 Ultrathin wall
- 5 Will fit standard well spacing
- 6 No carry-over contamination
