

P200

The DROPETTE®

DISPOSABLE TRANSFER PIPETS

These unbreakable all-in-one pipets eliminate the hazard of broken glass and exposure to infectious materials. Put an end to matching rubber bulbs with glass pipets. Molded from see-through low density polyethylene. Inert to biological fluids and most acids. The low-affinity surface reduces the loss of cells and valuable proteins due to binding. Can be sealed and refrigerated. They work well whenever there is a need for quick, safe transfer of fluids. Temperature resistant down to -196 °C. Can be gaz (EtO) sterilized.

Choose between twelve very popular models, available in several sizes, tip designs and lengths, in sterile and non sterile packaging. The sterile pipets are identified in the list with an "S" after the catalog numbers. Seven models provide graduations.

Packaging: All non sterile pipets are in Pk/500 and Cs/5000 **except** P200-82 are in PK/400 and Cs/4000. Most sterile pipets are packed in Pk/400 and Cs/4000.
