SAMPLE TUBES

WITH EXTERNAL THREADS

Made of polypropylene

Designed for the storage and transportation of biological material. Manufactured from non-toxic polypropylene, the tube provides strength and clarity and exhibits some unique design features. The vial has external threads, providing a smooth and uniform inner surface, thus reducing the risk of contamination. Tubes can be autoclaved in upright position with caps loosened. Height of tube is with cap.

Round bottom tubes only can be centrifuged up to 17,000g.

These leakproof tubes are tested with silicone washer screw caps at 20 PSI.

Screw caps sold separately

CAPS FOR SAMPLE TUBES

Made of polypropylene

Caps are available either with or without a silicone washer between the cap and the tube to ensure a positive leakproof seal at all temperatures. Caps and tubes are also made of polypropylene, providing the same coefficient of expansion for both, which further enhances the leakproof qualities of the vials at changing temperatures. The cap features a long skirt and a super-fast thread design allowing it to be removed or screwed on with a single turn. Autoclavable.

Specially designed polypropylene inner lip ensures leakproof seal.

Silicone washer for a more secure seal.
