# M700
SlideFile™ STORAGE SYSTEM

The most convenient, organized and versatile way of storing 75 x 25 mm or 3 x 1 in. microscope slides. This impact resistant SlideFile™ Storage System can hold up to 400 slides per unit in just 1720 cm³ (105 cu. in.) and is stackable for space efficient storage.

Each SlideFile™ Storage System includes a slide box and a removable tray. A tinted hinged cover makes the contents of the box easy to see at a glance. The base is available in five different colors to help in slide classification and to minimize the possibility of sample mix-up. Two index cards numbered from 1 to 100 are supplied with each box.
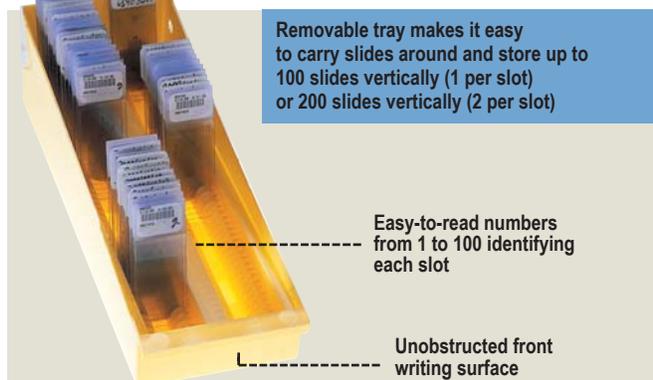

The key to the SlideFile™ System is a removable tray inside the storage box having hundred individual numbered slots. All slides are stored upright for easier insertion and removal. Simply tilt them forward and backward with one finger to easily and rapidly pick up the slide you need. A unique feature with this system is to be able to read bar codes without having to remove the slides from the box.

For space saving purposes, you can double the amount of slides simply by storing two slides per slot. And for maximum storage space, simply remove the tray and line up 400 slides in 3 rows for long term storage. Will resist temperatures between -80 °C and +80 °C. Not autoclavable.

Dimensions: 82 x 245 x 86 mm H. (3¼ x 9⅝ x 3⅜ in. H.)

Two index cards numbered from 1 to 100 are supplied with each box.

Contents easy to see through tinted hinged cover

Stackable for space efficient storage

Choice of five colors facilitating inventory control

Unobstructed front writing surface

This tray is also available separately under M710 Series

Removable tray makes it easy to carry slides around and store up to 100 slides vertically (1 per slot) or 200 slides vertically (2 per slot)

**Easy-to-read numbers from 1 to 100 identifying each slot**

Unobstructed front writing surface

Double the available tray capacity by placing 2 slides per slot.

Remove slide tray, store up to 400 slides.

Simply tilt slides forward or backward with one finger to easily and rapidly pick up the one you need.

Read bar codes without having to remove slides from tray.
